

**JOB: Android Developer** (Ref. No. 0184)

**LOCATION:** Anywhere

**CONTRACT TYPE:** B2B / Independent Contractor

**DURATION:** Two-month, full-time contract

Lean Street Company is a high-touch tech consulting agency founded on the idea of eliminating waste in product development and creating a process that supports rapid innovation.

We are hard-working, extremely passionate about technology, provide complete transparency and understand how to best collaborate with other teams and businesses.

Our talent is gathered from around the world. To be part of the Lean Street team you have to be more than a top-notch developer - you have to be passionate, assertive in communication, able and eager to walk a mile in the client's and user's shoes, and advocate on their behalf. We encourage lifestyle employment where we offer flexible work schedule as long as you get the job done.

## RESPONSIBILITIES:

- + Consult our customer in the planning and pre-development phase
- + Support Project Managers in planning tasks and execution
- + Develop customized Android applications

## REQUIRED SKILLS:

- + Ability to work independently and self-manage
- + Advanced experience of Android App development
- + Advanced experience of Android SDK, Java and Kotlin
- + Advanced knowledge of IDE and development tools
- + Knowledge of database and object storage implementations
- + Excellent communication skills

## BONUS SKILLS:

- + Knowledge of C or C++
- + QA methods
- + CI/CD Pipelines
- + Understanding of non-standard architectures
- + Experience working with internationally distributed teams
