

JOB: Junior Designer (Ref. No. 0175)**LOCATION:** Anywhere**AVAILABILITY:** Full-time

Lean Street Company is a high-touch tech consulting agency founded on the idea of eliminating waste in product development and creating a process that supports rapid innovation.

We are hard-working, extremely passionate about design and technology, provide complete transparency and understand how to best collaborate with other teams and businesses.

Our talent is gathered from around the world. To be part of the Lean Street team you have to be more than a top-notch designer - You have to be passionate, assertive in communication, able and eager to walk a mile in the client's and user's shoes, and advocate on their behalf. We encourage lifestyle employment where we offer flexible work schedule as long as you get the job done.

JOB DESCRIPTION:

We are looking for a Junior Designer to straddle both product and marketing design for our client roster. Responsibilities will include the application of our brand guidelines to multiple online products/platforms as well as marketing (website, social, emails). You will work in conjunction with our in-house Creative Director and client-side developers to implement an updated look and feel to our client's core products, and play a major role in how the brand's visual style is conveyed in marketing, from launch to future campaigns.

RESPONSIBILITIES:

- + Collaborate with the Creative Director and developers to implement a holistic design approach, applying the brand to both product UI and visual marketing.
- + Design layouts, prototypes and mockups for review and feedback
- + Build reusable symbols and libraries for future use.
- + Ensure the technical feasibility of UI/UX designs.
- + Collaborate with other team members and stakeholders.
- + Maintain updated knowledge of the design industry, best practices and any advancements in technology.

SKILLS:

- + Proficient understanding of Sketch including organization of styles, symbols, elements and components.

- + Proficient understanding of full Adobe suite (Photoshop, Illustrator, After Effects—nice to have, others a plus)
- + Basic understanding of InVision prototyping.
- + Familiarity with front end code (i.e. fixed heights/widths, pinning, positioning, etc.)
- + Proficient understanding of designing for multiple breakpoints, with a mobile-first mentality.
- + Understanding of Abstract design repositories for Sketch file versioning and hand-off—a big plus.
