

JOB: Senior JavaScript Developer (Ref. No. 0160)

LOCATION: Anywhere

AVAILABILITY: Full-time

Lean Street Company is a high-touch tech consulting boutique agency founded on the idea of eliminating waste in product development and creating a process that supports rapid innovation.

We are hard-working, extremely passionate about technology, provide complete transparency and understand how to best collaborate with other teams and businesses.

Our talent is gathered from around the world. To be part of the Lean Street team you have to be more than a top-notch developer - you have to be passionate, assertive in communication, able and eager to walk a mile in the client's and user's shoes, and advocate on their behalf. We encourage lifestyle employment where we offer flexible work schedule as long as you get the job done.

RESPONSIBILITIES:

- + Design, develop, and maintain web applications deployed on AWS
- + Attend daily stand ups and other sprint meetings related to Agile/Scrum methodology
- + Perform code reviews and mentor junior engineers and offshore consultants
- + Communicate effectively with members of cross functional team

SKILLS:

- + Experience with Node.js, Express, React, Typescript, npm, Git, Webpack, lint
- + Experience with Rest APIs – calling them and also developing them on Node
- + Willingness to convert UX designs into HTML/CSS
- + Excellent communication skills

BONUS SKILLS:

- + Knowledge and understanding of AWS, Docker, CI/CD, and DevOps
- + Experience with GraphQL
- + Understanding of SEO/SEM, Google Analytics, and online marketing technology
